STATE OF MARYLAND,
OFFICE OF THE STATE BOARD OF EDUCATION,

BALTIMORE, JANUARY 15, 1885.

To His Excellency, HENRY LLOYD,
Governor of the State of Maryland.

SIR: I have the honor to transmit to you the Annual Report of the State Board of Education for the school year ending July 31, 1886, and the fiscal year ending September 30, 1886, with accompanying documents, as required by law.

Very respectfully,

Your obedient servant,

M. A. NEWELL,

Secretary.

REPORT

OF THE

STATE BOARD OF EDUCATION.

The following summary, in connection with the accompanying tables, exhibits in a condensed form the most important facts connected with the administration of the public school system of the State, including the City of Baltimore, for the school year ending July 31st, and the fiscal year ending September 30th, 1886, so far as such facts can be presented in figures. The several items are compared with the corresponding items for 1885:

Number of schools in Baltimore city.....	124	
" " the counties.....	1,988	
Total.....		<u>2,112</u>
Being an increase in 1886 of.....	22	
Number of different pupils, city.....	54,221	
counties.....	120,759	
Total.....		<u>174,980</u>
Being a decrease in 1886 of.....	1,413	
Highest number enrolled in one term, city.....	40,879	
county.....	103,519	
Total.....		<u>144,391</u>
Being an increase in 1886 of.....	1,196	
Average number in daily attendance, city.....	34,843	
counties.....	59,719	
Total.....		<u>94,562</u>
Being an increase in 1886 of.....	1,599	
Number of teachers, city.....	969	
counties.....	2,577	
Total.....		<u>3,546</u>
Being an increase in 1886 of.....	128	
Number of months schools were open, city.....	10	
counties.....	8.7	
Average for the State.....		<u>9.1</u>
Being an increase in 1886 of one-tenth of one month.		
Receipts from all sources, city.....	\$ 728,802 52	
counties.....	1,051,595 14	
Total.....		<u>\$ 1,780,397 66</u>
Being an increase in 1886 of	\$21,811.88	

175789

Amount paid for building, repairing and furnishing schoolhouses	\$	105,794	32	
Increase in 1886	\$			17,529 83
Amount paid for books and stationery	\$	51,369	63	
Increase in 1886	\$			714 89
Amount paid for supervision and office expenses	\$	43,401	79	
Increase in 1886	\$			2,586 75
Amount paid for incidental expenses, including fuel and rent	\$	58,354	14	
Decrease in 1886	\$			139 72
Amount paid for interest	\$	4,243	65	
Increase in 1886	\$			787 77
Amount paid for miscellaneous expenses	\$	5,537	42	
Decrease in 1886	\$			925 20
Amount of indebtedness paid	\$	43,756	29	
Decrease in 1886	\$			19,306 45
Total expenditures for public school purposes in the counties				\$1,021,628 69
Being an increase in 1886 of	\$	4,366	86	

The items of expenditure which show an increase are :

Teachers' salaries	\$	3,168	99	
Building, repairing and furnishing schoolhouses		17,529	83	
Books and stationery			714 89	
Supervision and office expenses			2,586 75	
Interest			787 77	
Total	\$			24,738 23

The items which show a decrease are :

Incidental expenses	\$	139	72	
Miscellaneous expenses			925 20	
Indebtedness paid			19,306 45	
Total	\$			20,371 37

Showing a net increase of expenditure in 1886 of.... \$ 4,366 86

The usual annual increase in the number of different pupils has not been kept up, owing to bad weather and an unusual amount of sickness among children ; but it is pleasing to note a considerable increase in the average daily attendance, which shows that the general efficiency of the schools has been maintained. The increase in the annual expenditure is less than three dollars per capita of the increase in the average daily attendance.

MEETINGS OF THE STATE BOARD.

The State Board of Education held five meetings during the year.

At the meeting held on the third day of September, 1886, the death of Mr. James W. Thompson, who had been the executive officer of the School Board of Queen

Anne's county since the beginning of the system in 1865, was announced, and the following minute was unanimously adopted :

"The State Board of Education has heard with deep regret of the death of Mr. James W. Thompson, of Queen Anne's county. His long, faithful and efficient services in behalf of public education for more than half a century, as teacher and as school superintendent, commanded the respect and deserved the gratitude of all who knew him personally or officially. His colleagues in the County School Board always reposed the highest confidence in his integrity and discretion ; the teachers under his supervision looked up to him as a father and a friend ; and the children of the schools regarded him with veneration and affection. By his death the State Board of Education has lost a judicious and energetic officer, a wise counsellor, a long tried and trusty comrade."

ASSOCIATION OF SCHOOL COMMISSIONERS.

The Association of Public School Commissioners which met on the 24th of November, 1886, passed the following resolutions in reference to the decease of Mr. Thompson :

"*Resolved*, That in the death of James W. Thompson, late examiner of the Public Schools of Queen Anne's county, the Public School system of the State has lost one of its most efficient, useful and honored officers.

"*Resolved*, That his long career in the Public School service, longer than that of any other examiner under our uniform system, was without a blemish ; that he has left his impress upon the schools of his county, and that his loss will be felt in the school councils of the State.

"*Resolved*, That as friends and schoolmen we shall miss his ripe experience, accurate judgment and useful counsel.

"*Resolved*, That we will long cherish his memory, and in recognition of his high character and meritorious

services, direct these resolutions to be placed upon the journal of proceedings."

The following resolution was unanimously adopted by the Association of Public School Commissioners at the same meeting.

"WHEREAS, The Comptroller of the Treasury of Maryland, Hon. J. Frank Turner, has always manifested a desire and uniform endeavor to maintain the integrity of the Public School fund, and to save the School Boards any embarrassment that might ensue from uncertainty both in the standard and equalization of its distribution : therefore

Resolved, That the Comptroller's skillful management and just administration of the Treasury Department of the State is entitled to the acknowledgment and regard of this Association."

STATE TABLES.

The State Tables annexed present the usual summary of interesting facts.

Table "A" shows the population of Maryland by counties, and the number of white and colored, according to the census of 1880.

Table "B" shows the population between 5 and 20, and the quarterly distribution of the State School Tax to the white schools of the several counties and the City of Baltimore.

Table "C" shows the assessed value of the property subject to taxation in the several counties, with the amounts, as "State School Tax," "Free School Fund," "Academic Fund," "Appropriation to Colored Schools" and "County School Tax."

Table "D" shows receipts from all sources with the totals, (including balances carried over.)

Table "E" shows the expenditures of the several counties under the items of teachers' salaries, incidental expenses, books and stationery, building, repairs and furniture, supervision and office expenses, miscellaneous, interest, indebtedness paid, with the balance on hand and the totals.

Table "F" shows the number of pupils in the primary grades, and the number studying special branches.

Table "G" shows the number of schools in each county, the number of months schools were open, the number of teachers, male and female, the number of different pupils, the average number of pupils enrolled and in attendance, and the highest number enrolled in one term.

Table "H" shows the cost of the colored schools and the statistics (under the same heads as those mentioned in Table "G") of the colored schools separately.

Table "I" shows the expenditures for colored schools under the heads mentioned in Table "E."

Table "K" gives the statistics of the several colleges receiving State donations, and of the State Normal School.

Table "L" gives the statistics of the several schools and academies receiving State donations.

The County Reports give in detail the enrolment and the average attendance for each term, and the expenses of each individual school, under the heads of rent, fuel, repairs, incidentals, furniture, blackboards and stoves, books, and teachers' salaries. Every citizen can thus know what the school in his district has cost, and may become the auditor of the accounts. It is believed that no State in the Union furnishes a similarly minute detail of expenses. In the larger States, indeed, such detail would be impracticable; but as the County School Board has almost autocratic powers in our State, within the limits of its legitimate income, it has been thought advisable to show exactly how these powers have been exercised. The record on the whole is highly creditable.

Signed,

P. A. WITMER,
JAMES L. BRYAN,
WILLIAM DALE,
THOMAS C. BRUFF,

M. A. NEWELL, *Secretary.*

SECRETARY'S REPORT.

Report of the Secretary of the Board.

Last year a circular was sent to the Secretary of each of the County School Boards asking for "a much fuller statement than usual of the condition of education in the counties;" and suggesting a comparison of the year 1885 with 1865 or 1875, as regards facilities for education, and specifying the following items—school-houses, teachers, teachers' associations, libraries, high schools, private schools, colleges and academies, school trustees, the higher branches in public schools, school attendance, as topics deserving special mention in their reports.

To this circular replies were made by a majority of the secretaries, and these replies give us the best historical summary, and the most accurate account of the present condition of education in the counties represented, which we possess. They will be even more valuable in the future than they are now, as they will furnish a point of departure from which to reckon distances either forward or backward.

The counties not responding to the request are Anne Arundel, *Wm. Harwood*; Calvert, *J. B. Duke*; Caroline, *James Swann*; Cecil, *Rev. John Squier*; Frederick, *D. T. Lakin*; Garrett, *C. B. Ludwig*; Harford, *N. L. Mitchell*; Howard, *J. G. Rogers*; Wicomico, *Thomas Perry*; Worcester, *Geo. M. Upshur*. Of the ten secretaries who failed to respond, four are not now in office; of the thirteen who sent replies one has been displaced.

Of all the factors that enter into the product known as the "Public School System," the Secretary and Examiner, in his function of school superintendent, is the

greatest. Without his influence we may have some good schools, but we cannot have a well administered system. With the exception of Baltimore county, three-fourths of all the teachers in the State have had no special training for their work. Many of them have had some experience, but experience undirected or misdirected is of doubtful utility. It is the duty of the Examiner to give such direction to the efforts of his untrained teachers as will make experience valuable—by his visits to the schools, and his intercourse with teachers at their educational associations, district, county, State and national. He may, if he has the faculty, inspire them with a lofty enthusiasm; he may set before them a high ideal; he may aid them in many of the small but harassing duties of the school-room. But to do this, he must be himself a teacher, in spirit at least if not in practice, and he must surrender himself entirely to the duties of his office. The work he has to do cannot be rightly performed in a half-hearted and perfunctory manner. It needs not only all a man's time, which the law absolutely requires, it needs, also, all his intellect at its brightest, and all the fire of his zeal at its hottest.

Some discussion has arisen about the meaning of the clause in the School Law, which requires the examiner to "devote his whole time to the duties of his office." It was argued that the words, "whole time," could not be taken literally, else the man would not have time to eat and sleep. It was further contended that his "whole time" means just so much of his time as he finds sufficient to discharge the duties of his office according to the standard which he himself may adopt. A disinterested and unprejudiced person will have no difficulty in perceiving the true intent of the law. It is that the public school system has a right to all the *business* time of the examiner. It will not interfere with his eating, his sleeping, his family and social duties, nor with his legitimate amusement. But it does claim that no part of the business day shall habitually be occupied

with other than Public School business. The school law perhaps prescribes less than enough to occupy the full business time of an examiner. It becomes his duty then to find educational work for himself, within and not outside of his official duties. For example, if the School Law requires him to visit schools twice a year, and time hangs heavy on his hands, let him visit them three times a year. But it is not consistent with the law for him to employ his unoccupied time in the habitual exercise of any trade or profession.

The complaint is frequent that the Examiner has more to do than he is able to do well. It is said that, if the office work is kept up, the visitation of the schools must be neglected, and if the schools are visited as required by law, the office work must be slighted. It is true that the duties of the executive of the County School Board as Secretary, Treasurer and Examiner, are complicated and exhausting in all except the smaller counties. In the larger counties the law allows an Assistant Examiner. Where there are two officers, one of them should be always in the field and one regularly in the office. The difficulty is greatest in counties of a medium size, where the work is sometimes too much for one and yet too little for two. The time of an Examiner is sometimes taken up very unprofitably in making up packages of books to be sent to different schools, a work which could be done as well by a boy of sixteen at \$3.00 a week as by a man at \$1,000 a year.

It would be hard to say which of the complex duties devolving upon a County Examiner is the most important ; but there is one which can be performed by no one but himself, and that is the visitation of the schools. The members of the School Board can assist in financial matters ; they can aid in looking after new buildings ; they can employ temporary service in keeping up the record ; they can hire a boy to tie the book parcels ; but no one except the Examiner can visit the schools with profit. And yet this is the department which is always first to suffer. The law requires 4,015 visits to be made in the

year. The number of visits actually made, as reported by the Examiners themselves, was less than 3000 last year; and many of these visits were merely superficial calls, not professional visits. When an Examiner reports that he has made four visits in one day, and the schools are located at two or three miles from one another, it may readily be inferred that the visitation was not a very formidable one.

Dr. E. E. Higbee, State Superintendent of Public Instruction in Pennsylvania, has given in his last Report the following summary of the duties of a County Superintendent, taken in great part from the rules issued by the Hon. Geo. W. Ross, Minister of Education in the Province of Ontario, Canada.

"It shall be the duty of every County Inspector—

1. *To visit each school* under his jurisdiction at least once in each term.

2. *To spend half a day in each school.* Where a school has several departments, the Inspector should spend half a day in each department. When, however, from the character of the work done, an Inspector thinks it would be in the interest of the school to extend his visit over the whole day, he should do so. The half-day limit is the average time required for each visit.

3. *To satisfy himself of the progress made by the pupils from time to time.* This cannot be done without many memoranda of the standing of each class. It will therefore be necessary for the Inspector to make copious notes in regard to each recitation showing the condition of each class, and the proficiency attained in the several subjects of the curriculum. This part of the work should be thorough and searching, and the conclusion arrived at should be based on the Inspector's own observation.

4. *To examine into the methods of instruction pursued by the teacher.* To do this the Inspector should require the teacher of the school to teach several lessons in his presence. In this way the teachers' methods can

be observed, and hints given for improvement, should he evince any faults of method or of manner. Great attention should be paid to methods; the proper and logical presentation of a subject is so important that success is impossible without it.

5. *To teach a few model lessons himself.* The proper method of teaching subjects that are found to be neglected or badly taught by the teacher should be exemplified by the inspector. Here, all the qualities which go to form the model teacher should be exercised. His methods of questioning and of receiving answers, of rousing the enthusiasm of the class, of securing attention, of reaching by apt illustration the judgment of the pupils, are all eagerly watched by the teacher, and should serve both as a model and as a stimulus to him in the future.

6. *To ascertain the nature of the discipline exercised by the teacher.* This, no doubt, will appear from the attention and diligence of the pupils without special inquiry. The *manner* of the teacher will very soon indicate the nature of the discipline. It would be well, nevertheless, to ascertain whether corporal punishment is frequently resorted to, and, if not, what are the punishments (if any) usually inflicted.

7. *To examine the registers, maps, seats, and all the internal and external equipments of the school-house—*(a). He should see that the register is properly and neatly kept, and ascertain whether or not entries are made therein daily; (b). That the maps are suitable and well preserved; (c). That the blackboards are in proper repair, and that crayons and brushes are fully supplied; (d). That the furniture is generally adequate; (e). That proper attention is paid to the heating and ventilation of the rooms; (f). That the fences and out-houses are in proper repair; (g). That the school library is suitably cared for.

8. *To report to directors in regard to such matters as require their attention.* This duty the Inspector should never neglect. The directors of schools expect to be

informed and directed as to many matters coming under the cognizance of the Inspector, who is, in a certain sense their officer, and is elected for the very purpose of aiding them in the discharge of their duties. His report, therefore, on the school should be full.

9. *To give such advice to teachers as may be deemed necessary.* This part of the Inspector's duty should be performed with tact and delicacy and perfect frankness. Whatever defects in the teacher's manner, or in his discipline of the pupils, or methods of instruction, are discovered during the inspection of the school should be plainly pointed out. Wherever the Inspector has reason to believe that there is any defect in the organization of the school, or in its classification, or in attention on the part of pupils it should be referred to, and the proper remedy suggested. This, of course, should be done privately—not in the presence of the pupils."

THE SCHOOL LAW.

The report for last year was so full that it is not thought necessary to discuss the same topics in this report. The following recommendations in the reports for 1884 and 1885 are now renewed.

1°. Necessary text-books *for use in the school-room* should be supplied without charge to the scholar.

2°. The State School Tax should be twelve cents on the hundred dollars, and the minimum county school tax should be no less.

3°. The State tax should be distributed to the several counties in proportion to the average enrollment of pupils, white and colored; no pupil to be counted who has not made an attendance of at least sixty days, or one hundred and twenty half days in the school year.

4°. The few remaining county academies should be made a part of the public school system.

5°. There should be but one school district trustee instead of three as under the present law.

6°. Every principal of a public school should be required to make report at least twice in the month by

postal card to the Examiner of the condition of his school as regards attendance, &c.

7°. Legal provision should be made for ascertaining accurately once in every two years, in the City of Baltimore and the several counties, the number of children of school-going age, (say over six and under sixteen years,) and the number attending private and denominational schools.

At the session of the General Assembly, beginning January 6, 1886, the following Acts relating to public education were passed:

Chapter 19, authorizing the County Commissioners of St. Mary's county, to build a schoolhouse for colored children in Medley's Neck.

Chapter 72, authorizing the State Treasurer to pay School Commissioners of Wicomico county, money paid into the Treasury by Stephen P. Toadvine.

Chapter 87, authorizing County Commissioners of Baltimore county to build a schoolhouse near Lafayette Avenue.

Chapter 123, authorizing Comptroller to apportion to Garrett county its proper proportion of the State School Tax.

Chapter 146, providing for building a school for white children at Brandywine station, Prince George's county.

Chapter 223, providing for relief of the Board of County School Commissioners of Baltimore county.

Chapter 245, authorizing County Commissioners of Prince George's county to build a schoolhouse for white children at Melwood.

Chapter 326, for benefit of F. Knapp's English and German Institute.

Chapter 344, authorizing County Commissioners of Baltimore county to build a schoolhouse at Rayville.

Chapter 357, authorizing County Commissioners of Washington county to build a schoolhouse in Hagerstown.

Chapter 408, empowering School Commissioners for

Prince George's county to dispose of certain school property.

Chapter 414, authorizing County Commissioners of Garrett county to build a schoolhouse in the town of McHenry.

Chapter 436, authorizing County Commissioners of Baltimore county to build a schoolhouse near Habitation, near the Parkton road.

Chapter 495, providing for teaching the study of physiology and hygiene in the public schools of the State.

Chapter 499, providing for the relief of Western Maryland College.

Chapter 293, providing for the appointment of School Commissioners in Prince George's, Charles, Caroline and Montgomery counties.

With regard to such Acts as in chapters 19, 87, 146, 245, 344, it may be said that the General School Law, (chapter 377, 4, 4, of 1872,) makes it the duty of the County Commissioners to "build, repair and furnish schoolhouses," and any interference with this prerogative, however well intended, is sure to cause injury in the end. General laws cannot be set aside and replaced by special laws with impunity. If they are not adequate to the purpose for which they were intended, they should be repealed and better laws enacted in their place.

The same remarks apply to chapter 293, which provides for the appointment of School Commissioners by the Governor. The Constitution of Maryland forbids the General Assembly to pass any "special law for any case for which provision has been made by an existing general law." As the appointment of School Commissioners has been provided for by a general law, it is hard for one not a lawyer to understand how a special law over-ruling the general law can constitutionally be enacted.

Waiving the constitutional question, however, it may be asserted that such special legislation is evil in itself, and tends to produce still greater evil.

SCHOOL BOOKS.

The following are the principal methods in use in the several counties for furnishing text books to schools. It will be understood that each county adopts only one of these methods.

1°. The County School Board has nothing to do with it. Uniform books are "adopted" and prescribed; parents buy them where they please, and when they please, and sometimes refuse to buy at all.

2°. The School Board adopts the books and makes arrangements to have them sold at certain depositaries, conveniently distributed over the county, and at fixed prices.

3°. The School Board purchases the books at whole-sale rates, and sells at a slight advance to the pupils. The books are stored in the office of the board, and are made up into packages by the Examiner (or an assistant) and given to the teachers who call or send for them, and are charged with the cost, which is deducted from their salaries at the end of the term.

4°. The board adopts and purchases the books, and charges a rental for the use of them. The charge varies from twenty-five cents to one dollar a quarter. The teacher collects the fees; if he fails to collect, the amount is deducted from his salary, except in the case of indigent pupils, who may be exempted from payment by order of the Board of District Trustees.

When books are rented there are two modes of distribution.

(a). Books are sent to the office of the School Board and are there distributed by the Examiner to teachers who make application for them.

(b). A teacher sends a request on a printed form to the Examiner for certain needed books. The Examiner scrutinizes it, and if he thinks the requisition unreasonably large, cuts it down to the proper dimensions. The requisition is then sent to the book publisher, with whom a contract has been made, and the contractor sends the books to the address of the teacher. Finally

the teacher certifies to the Examiner that the books have been received.

To the first, second and third methods of supply, there is the objection that in some instances they fail in securing the books. Classes are kept waiting one, two or three weeks because certain pupils are dilatory in procuring the necessary books. In the fourth method, the distribution of books by the Examiner personally is very objectionable, inasmuch as it occupies in trivial service much of his time, which could otherwise be much better employed. To this method, under the second mode of distribution, the chief objection is that a school to which one has to pay an admission fee under whatever name, cannot properly be called a *free school*. No workshop is complete without the tools which the work calls for; every schoolhouse should have within its own walls all the books needed for use in school.

It must be admitted that the State is not in condition to add \$75,000 a year to the school taxes. Yet that is no reason why we should shut our eyes to the evils of the pay system of books, or refuse to take some feasible steps towards getting rid of it. The prominent objection is that it establishes among us, and labels, a class of "indigent pupils;" a most objectionable feature under our form of government, whether the class is really indigent, or whether, as often happens, indigence is only a cloak for meanness.

But this is not the gravest objection. The books when purchased outright, as they are in most counties, are necessarily held in severalty as individual property. The school is popularly supposed to be completely equipped when each child has his own book. But nothing can be further from the truth. The lower grades need charts, maps, objects, numeral frames and various small pieces of apparatus which there is no money to buy, and which will not be bought so long as this pay system, and the ideas from which it sprung, and which it serves to perpetuate, are kept up. It is probable that

two-thirds of the schoolhouses in the State have nothing to aid in the work of instruction but desks, blackboards often insufficient both in quality and quantity, and a dilapidated map of Maryland. If the money which has been spent in severalty for books during the last five years by the four lower grades had been judiciously expended as a school-fund, the children would have had all the school-books they needed, and a fair supply of useful apparatus.

The addition of two per cent. to the income derived from the county school tax, for the purpose of making books free to pupils of the first grade, would give us not only the required books, but a supply of charts more useful than the books. If one per cent. more were added yearly for the next three years, the school could be well supplied with primary apparatus for the four lower grades. Farther than this it is not proposed to go at present. But let it be understood that the first step towards the further improvement of our schools is to make them what the Scotch call "self-contained," that is, having within themselves and without reference to the ability or the wishes of parents, all the appliances needed for the accomplishment of the best school work. There was a time when a personal "rate bill" was thought essential to the maintenance of a school;—when even fuel was furnished in severalty. That time has passed away, and the time is approaching speedily when the book purchase and the book rent will be numbered with the relics of the past.

INTRODUCE FREE BOOKS GRADUALLY.

School-books are now supplied to Public Schools of Baltimore city without charge; and there is a growing feeling throughout the State in favor of a similar measure in the county schools. The chief, if not the only objection, is the expense.

But it is not necessary to continue the present rate of expenditure for books. It would be possible to make the change gradually. Books might be furnished free to the first (lowest) grade next year; the additional cost

would scarcely be felt; to the first and second grades the year following; the year after, to the first, second and third grades, and so on. It is urged as an objection to free books that children having no property interest in these books will abuse them, and thus increase the necessary cost to the county. In reply, it may be said that experience shows that books which are owned by the county are as well taken care of as those owned by the pupils, perhaps better. Here it may be observed that it is not proposed to place "free books" in the hands of little children to be carried daily to and from school. They are to remain in the school-room, to be used during school hours when needed. They are part of the furniture of the school-room, and are to be considered fixtures like the desks and blackboards. But how are children to study their "home lessons," if their books are locked up in the school book-case? "Children" under the fifth grade have no business with home lessons. If they are employed diligently for six hours a day in school, they have done all the intellectual work of which they are capable—perhaps more. "Home lessons" for the lower grades are a delusion and a snare; they do more for the maintenance of fossil teachers, and for the prevention of the improved methods of instruction and government, than all other causes combined, not excepting the prejudices of ignorant parents. There comes a time, when the pupil is no longer a child, and must begin independent study at home. Whether when this period arrives the school should supply him with a home library of text-books without cost, or should require him to purchase his own books, are questions which will bring their own answer when the future demands a solution.

SCHOOL HOUSES.

During the past year a considerable number of new houses has been built at an expense of nearly \$100,000. The houses are of various classes, some of them small houses in rural districts not costing much over \$300 each, and accommodating about twenty-five pupils. These

houses will serve the purpose for eight or ten years, when it can be determined whether they should be abandoned, or replaced by more permanent structures.

There are also houses costing from \$500 to \$800 each, in settled neighborhoods, accommodating from thirty to fifty pupils under one teacher. These houses require more care in construction than the first mentioned, and are intended to be permanent. Lastly, there are houses costing \$1000 and upwards, intended for two or more teachers, and accommodating from 60 to 600 pupils. Very few school boards know how such houses should be built, and as they will last for several generations, and by their architecture largely determine the kind of instruction that shall be given in them, it is of great importance that the school boards should have good advice as to their construction. When the school law comes before the Legislature for revision, it would be advisable to have a Supervisor of Schoolhouses appointed. His compensation should be a certain percentage on the cost of the houses, and his plans should be submitted to the State Board of Education before being adopted. This would not add to the first cost of the buildings, and would insure the erection of houses corresponding to the demands of the times.

In building a schoolhouse several things should be considered; the *location, orientation, dimensions, lighting, heating and ventilation.*

As to *location*, the house should be as near as possible to the centre of the school district, not the geographical centre, but what may be called the centre of convenience, considering the routes by which it may be approached and the number of pupils coming by each route. The site should be comparatively high, easily drained, and easily kept in order. If a site can be obtained on the edge of a wood which shelters it from the prevalent winter winds, that location should be preferred.

As to *orientation*, it is desirable that pupils sitting at their desks should face the north. This will help them in their geographical studies; the coldest winter

winds will be cut off if the main entrance is on the south, facing the teacher's platform, and in summer the pleasant southern breeze can be admitted by opening the doors.

As to *dimensions*, the first thing is to determine how many pupils are to be seated ; then to measure the desks which it is proposed to use; finally, to build according to these measurements, making proper allowance for aisles, stoves, the teacher's desk and recitation benches. It not unfrequently happens that a house is built of certain specified dimensions, but without reference to the furniture to be placed in it. The result is, either that the pupils are crowded or much space is wasted.

The teacher's desk being on the north side of the house, and the entrance doors on the south, the east and west walls will contain the windows ; and no direct light will be thrown into the eyes of either pupil or teacher. If the cross-light is objected to, the windows on the east may be darkened by opaque curtains.

Very few of even our new school-houses are properly ventilated. Two that I have visited lately deserve especial commendation. One is near Queen Anne Station in Talbot county, and was built under the special superintendence of the County Examiner, Professor Alexander Chaplain. An opening near the eaves admits air to the bottom of a ventilating stove. The air thus warmed rises towards the ceiling, and as it cools descends and is carried off under the floor by a duct leading to the foul air shaft. The chimney is divided longitudinally into two sections, one for smoke and the other for the foul air. On a cold day the temperature of this room was found to be nearly uniform in all parts, but a little higher at a distance from the stove. A cheaper but less effective method of ventilation is obtained by simply placing a register at the bottom of the cold air shaft constructed as above.

The sensations of teachers and pupils with regard to heat cannot be trusted. Every schoolroom should have a thermometer, and the temperature should be observed once every hour.

The other model schoolhouse to which allusion has been made is in Cumberland, and is known as the Centre Street School. It contains eight rooms and is thoroughly heated and admirably ventilated by furnaces in the cellar constructed on the Smead system, which allows the admission of either warm or cold air, or any admixture of the two, by simply turning a crank; and provides for the exit of foul air by openings in the washboards.

TEACHERS' TENURE OF OFFICE.

In many States the teacher is hired for one term. At the end of the term the contract has expired; the teacher may look for another school; the directors may look for another teacher. All places are vacant, and there is a general scramble for the best. In the City of Baltimore and many, if not all other large cities, teachers are elected for a year. At the end of the school year there is, by hypothesis, a general vacancy, and the School Board proceeds to fill them by re-electing at least nine-tenths, probably ninety-nine one hundredths of the former incumbents. There are few more permanent positions in any service than that of a public school teacher. Nevertheless, the annual possibility of a failure to be re-elected weighs with great force upon many efficient teachers. It would be merciful, to say the least, to make the law conform to the practice.

In the counties, the State Board of Education undertook to solve the problem, to reconcile the rights of the teachers and the rights of the public, of whom teachers are the servants. The solution was this. When a teacher is appointed to the charge of a school, he is appointed for no definite term. When he wishes to leave, he gives thirty days' notice of his intention, and at the end of the thirty days he is free. If the trustees wish him to leave, they give him thirty days' notice. In this way the teacher's mind is relieved and there is no scramble for places at the end of the year. In cases, fortunately almost unknown in this State, of open im-

morality or palpable inefficiency, the teacher may be suspended at once. If he objects, he has an appeal to the State Board.

COLLEGES AND EDUCATIONAL INSTITUTIONS RECEIVING
STATE AID.

The statistics of these Institutions will be found in tables K and L.

WASHINGTON COLLEGE reports under the signature of the President and Secretary that "during the last scholastic year there were thirty-three students in attendance; five of whom were graduated with entire satisfaction to the Faculty. The nine county scholars provided for by the Act of 1856, Chapter 219, and the six provided for by the Act of 1874, Chapter 282, were all filled by students who received tuition, board, books and stationery free of charge; and five indigent scholars in addition, have received tuition free of charge. The county scholarships are again all filled and the management of the institution continues to be satisfactory to the Visitors and Governors."

The WESTERN MARYLAND COLLEGE has an annual donation from the State of \$6,500 in addition to the sum of \$1,090 which comes from the Academic fund of the county. Both young men and young women are admitted. The Instructors are Rev. J. T. Ward, Prof. of Mental and Moral Science; B. F. Benson, Prof. of Belles Lettres; J. W. Reese, Prof. of Ancient Lang. and Literature; S. Simpson, Prof. of Natural Science and French; W. R. McDaniel, Prof. of Mathematics and German; A. H. Merrill, Principal of Male Preparatory Department and Prof. of Elocution; J. W. Hering, Lecturer on Anatomy, &c.; F. A. Schaeffer, Tutor in Mathematics, Greek and Latin; Miss L. A. Owings, Preceptress of Ladies' Department; Miss K. M. Smith, Assistant in Ladies' Department; Miss N. H. Davis, Teacher of Music, Ladies' Department; Mrs. Hull Troupe, Teacher of Drawing and Painting, Ladies' Department.

There were during the past year 115 students, 72 men,

43 women. The College property is valued at \$35,000. The library, accessible to students, contains 4000 volumes.

ST. JOHN' COLLEGE, Annapolis, the oldest institution of learning in the State, has an annual donation, as reported, of \$8,200 from the State. The Faculty is composed of Thomas Fell, A. M., President; A. S. Hall, A. M., Ph. D. Natural Sciences; C. W. Reid, A. M., Greek, Latin and German; C. W. Foster, U. S. A., Military Sciences and English Literature; J. H. Baker, U. S. N., Mechanical Engineering and Mathematics; J. W. Cain, A. B., Mathematics and Junior English; J. E. W. Revell, A. B., Tutor in Preparatory Department; J. L. Chew, A. B. Tutor in Preparatory Department. Of the 76 students in attendance last year, 35 were in the Preparatory Department, 17 in the Freshman class, 15 in the Sophomore, 5 in the Junior and 4 in the Senior. The College property is valued at \$120,000. The library contains 6,000 volumes.

THE BALTIMORE FEMALE COLLEGE, as its name implies, receives young women only. It has an annual appropriation from the State of \$2,600, in consideration of which 26 students are received without charge. The College property is valued at \$26,000. The library contains 3,900 volumes.

THE CHARLOTTE HALL ACADEMY is one of the oldest and most prosperous academies in the State. The Faculty consists of four professors in the Departments of Classics, Mathematics, Science and Modern Languages. There were 76 students in attendance last year, of whom 16 were educated without cost to their parents. The College property is valued at \$20,000. The number of volumes in the library is 1,200.

THE MARYLAND AGRICULTURAL COLLEGE has had a revival under the Presidency of Mr. Augustine J. Smith, and it is hoped that the revival will continue. All State aid has been withdrawn for the last four years, and the College is, nevertheless, in a hopeful, if not absolutely prosperous condition. The policy which allows the

College to use the United States land-grant, amounting to about \$6,000 a year, and yet refuses to supplement that grant to an extent that would make it really serviceable to the State, is hard to understand. But the fate of many of our institutions of learning is a hard one; they get enough to keep them barely alive, and not enough to maintain vigorous health.

THE STATE NORMAL SCHOOL has enjoyed another year of prosperity, if numbers (272) are a sign of success. The present annual appropriation was made in 1874, when the number of students in attendance was only 174. The income from an increasing number of paying students enabled the Board to meet the increased expenses, and the liberality of the last General Assembly furnished the means (\$4000) to put the building in good repair. An addition of \$1500 to the annual appropriation, making it \$12,000, or \$50 per capita for the free students in attendance, would meet the wants of the school for some time to come.

THE INSTITUTION FOR THE DEAF AND DUMB at Frederick is one of the best schools in the State, regarded merely as a primary school for defectives, and without reference to its special functions, in which it has no superior in the country. There were in attendance during the year, 99 pupils (50 boys and 49 girls) under the care of Principal Ely and eight assistants. It is to be regretted that all the deaf mutes in the State, of a suitable age, are not sent to this admirable school. The aid of the School Commissioners and County Examiners is invoked to make known to those interested, the advantages which the State offers to them without money and without price.

THE SCHOOL FOR THE BLIND in Baltimore, is another institution of which we may be proud. Under the continuous direction of Professor F. D. Morrison for many years, it has brought up hundreds of blind persons in ways of industry and virtue, who would otherwise have been a burden, if not a disgrace to the community. This school has been liberally dealt with by the Legis-

lature, and has made a liberal return for the money expended. The Colored School for deaf mutes and the blind is also rendering important and much needed service.

MARYLAND INSTITUTE, FOR THE PROMOTION OF THE MECHANIC ARTS.

The Night and Day Schools of Art and Design have well maintained their high reputation, and show in the work of their pupils average results not exceeded by any similar schools in the United States. The Night School had during the winter 382 pupils in the following classes: Free Hand, 150; Mechanical, 118; Architectural, 114. In the Day School there were 244 students, of whom 62 were in the regular classes, 90 in special classes, and 92 in the Saturday class composed principally of teachers and pupils engaged in public and private schools during the rest of the week. It would be hard to over-estimate the importance of this Institute to the City of Baltimore and to the rest of the State of Maryland. Both the city and the State contribute to its support, the fees paid by students add considerably to the income, but the amount derived from all these sources is not sufficient to meet the annual expenses. Temporary aid has been given by a number of liberal and public-spirited citizens, and it is hoped that their example will be followed by others: so as to secure the permanence of the Institute.

NORMAL SCHOOL FOR COLORED TEACHERS.

This school is becoming more popular every year. An additional room in the school-building has been required to accommodate the increased number of pupils, the enrolment being 256 as against 186 the previous year. Of these 38 were in the Normal department, three of whom were graduated, and five sent out as teachers. Unfortunately, a comparatively small number continue at school long enough to complete the course; and this will probably continue to be the case so long as colored teachers are not employed in the colored schools of the city.

MANUAL TRAINING SCHOOL OF BALTIMORE CITY.

The object of this school is to give practice in the use of tools and instruction in mathematics, drawing and the english branches of a high school course. The tool instruction includes carpentry, wood-turning, pattern-making, chipping and filling, forge-work, moulding, soldering and brazing, and the use of machine shop tools. The working hours of the students are divided nearly equally between manual and mental exercises. The school does not teach trades. Its aim is more comprehensive; it lays the foundation for many trades, and, at the same time, recognizes the value of intellectual discipline. Candidates for admission must be at least fourteen years of age, and present evidence of good moral character. They must also pass an examination in reading, spelling, writing, geography, English composition and the fundamental operations of arithmetic, as applied to whole numbers and fractions. No fee is required from resident pupils; the fee for non-residents is twelve dollars and a half per quarter. The course of instruction can be completed in three years.

I can say from repeated personal observation, that the school is in a highly satisfactory condition. It is doing a difficult but necessary work, and doing it well.

McDONOGH SCHOOL.

This is a school *sui generis*. In it eighty boys are lodged, fed, clothed, instructed and provided with medical attendance. It is intended to add twenty more to this number each year until the maximum is reached which the income of the school can support. The property of the foundation consists of: 1°. The bequest of Mr. McDonogh. This now comprises an endowment fund of \$705,000, invested in Baltimore city stocks, the McDonogh farm and the buildings upon it, and several tracts of unimproved land in Louisiana. 2°. The bequest of Dr. Zenus Barnum. He left at his death, March 23, 1882, an estate valued at about \$80,000, for the promotion of mechanical instruction and manual training in the McDonogh School.

Candidates for admission must be poor boys of good character, residents of the City of Baltimore, sound in body and mind, and between ten and fourteen years of age. As not more than one-fourth of the applicants can be admitted, it has been thought necessary to make a selection by means of a competitive examination in arithmetic, geography, reading, writing and spelling. The chief features of the past year were the completion of the new building for all departments of the school, and the opening of the Barnum shops for manual training in the dining-room of the old building.

JOHNS HOPKINS UNIVERSITY.

During the academic year 1885-86, the Johns Hopkins University completed the first decade of its existence. This event was appropriately celebrated on the 25th of April, 1886, when addresses were made by the heads of the different departments, reviewing the work of the last ten years. From these we gather the following figures :

The record of students attending the institution between the academic years 1876-77 and 1886-87, is as follows :

924 individuals were enrolled as students, of these 419 came from Maryland (including 380 from Baltimore), and the remainder from 35 different States of the Union and several foreign countries.

Among the former we may mention—

	From
69.....	New York.
47.....	Massachusetts.
38.....	Pennsylvania.
31.....	Ohio.
26.....	Virginia.
24.....	North Carolina.
19.....	New Jersey.
18.....	Kentucky.
15.....	Iowa.
15.....	District of Columbia.

And among the latter—

	From
16.....	Canada.
5.....	Japan.

Two degrees are conferred by the Johns Hopkins University—the degree of Bachelor of Arts and of Doctor of Philosophy. In the last ten years, 113 candi-

dates have been admitted to the degree of Bachelor of Arts, and 84 to the degree of Doctor of Philosophy.

During the Academic year of 1885-'86, the Academic staff of the Institution consisted of 48 teachers, 4 of whom were non-resident lecturers. The number of students actually enrolled (December 1886), is 359; of these, 209 are graduate students pursuing advanced courses; 109 are matriculate students following one of the prescribed College courses, leading to the degree of Bachelor of Arts; and 41 are special students in various branches.

The following table gives a systematic summary of the enrolment of teachers and students for the last five years of the first decade of the Institution's existence:

YEARS.	Teachers omitting non-resident Lecturers.	Total enrolled Students.	Graduate Students including Fellows.	UNDER-GRADUATES.		DEGREES CONFERRED.	
				Matriculate including Candidates.	Special including Prelim., Med.,	A. B.	Ph. D.
1882-'83.....	37	204	125	49	30	10	6
1883-'84.....	40	249	159	53	37	23	15
1884-'85.....	44	290	174	69	47	9	13
1885-'86.....	44	314	184	96	34	31	17
1886-'87.....	47	358	208	109	41		

The results of the examinations are made known to each student, and are annually communicated to his parents. Records are kept by the several instructors and are reported at stated times to the collective authorities.

During the year courses of lectures were given as heretofore, to which the public were admitted.

The new physical laboratory, with its revolving dome prepared for purposes of astronomical research, is nearly completed, and will shortly be occupied by the physical section of the scientific department.

The most prominent courses of study pursued during the past year, are the following:

SCIENCE.

Mathematics,
Astronomy,
Physics,
Chemistry,
Mineralogy,
Geology,
Biology,
Physiology,
Morphology,
Pathology, &c.

LANGUAGES.

Ancient,
Greek,
Latin,
Sanskrit,
Hebrew,
Arabic, and other Shemitic
Languages.
Modern,
German,
French,
Italian,
Spanish,
Portuguese,
English, incl.,
Anglo-Saxon, &c.

PHILOSOPHY.

Logic,
Ethics,
Psychology,
Pedagogics,
History of Philosophy,
History,
Political Science,
Institutional History,
Sociology,
Roman Law, &c.

Courses of instruction were also given in elocution and in free-hand and mechanical drawing. A fresh impetus was given to pathological investigation by the formation of new courses of instruction in that science, and the organization of a new pathological laboratory, well-equipped with the necessary apparatus. The library is daily increasing in size and at present contains 30,000 volumes, collected at a cost of \$63,635.

(Signed),

M. A. NEWELL,
Secretary.

REPORT OF THE
School Commissioners
OF BALTIMORE CITY.

BALTIMORE CITY.

HENRY A. WISE, *Supt.*H. M. COWLES, *Ass't. Supt.*

STATEMENT, SHOWING THE NUMBER OF SCHOOLS, TEACHERS, PUPILS ON ROLL, AVERAGE ATTENDANCE AND PERCENTAGE OF ATTENDANCE (BASED ON THE AVERAGE ROLL) FOR THE TERM ENDING NOVEMBER 20TH, 1886, AND THE NUMBER OF PUPILS IN SCHOOL DURING THE YEAR.

SCHOOLS.	No. of Schools.	No. of Teachers.	Number of Pupils on roll Nov. 20th.	Average Attendance.	Percentage of attendance.	Number in School during the year.

HENRY M. COWLES, SECRETARY.

REPORTS OF THE

School Commissioners

OF THE COUNTIES.

ALLEGANY COUNTY.

THOMAS G. McCULLOH, *President.* H. G. WEIMER, *Secretary.*

We have built and furnished during the year six houses, at a cost of \$10,190.

The final examinations show that the results obtained in the schoolroom were satisfactory.

The subject of locating schoolhouses is frequently a complicated matter, and it has engaged a considerable share of the deliberations and attention of the School Commissioners. Some persons seem to consider it necessary to locate schoolhouses in the geographical center of the district, without any regard whatever to the center of school population, the general surroundings; good water, and the cheerfulness and healthfulness of the location.

Neglect of Property.—School property is often very much neglected. Buildings are often suffered to become too much dilapidated before they are repaired. A little timely repairing and good careful teachers might avoid much in the way of damages and expenses.

School Attractions.—Many of our teachers deserve special mention for having their schoolrooms ornamented, the walls with mottoes, handsome chromos, and windows made attractive with flowers, all of which tend to exert a salutary influence upon the pupils in developing the finer sensibilities of character.

ALLEGANY COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1886.

	1886.	1885.
Number of schoolhouses.....	86	
Number of male teachers, principals—(white, 37; colored, 1; total, 38).....		38

ANNE ARUNDEL COUNTY.

RICHARD H. GREEN, *President.*WM. HARWOOD, *Secretary.*

We have built one schoolhouse this year, No. 6 in the Fifth District, which is an addition to our number, and replaced four that had gone much to decay. The sum of \$1,300 paid for a schoolhouse in Annapolis is the annual payment for the house on Green street, which was purchased some years since to be paid for in annual payments; but we expect to pay the whole balance of \$4,000 when it becomes due on the 30th of November.

Our school buildings for the colored population, many of them are miserable affairs, and our means do not enable us to do more than build one or two schoolhouses in a year for them to remedy this deficiency, but we are thus slowly improving. We find many of our colored people taking an earnest interest in the schools and giving us such assistance in our work as they can.

Our schools yet want many things in the way of globes, maps, and books to read auxiliary to the ordinary school books, but a gradual improvement is making in this respect also. There is a beginning of a library in some of the districts.

The irregular attendance of children is much complained of by our teachers, while it seems most difficult to make parents understand the need of regular attendance for the children's advancement. Some parents are obliged to have the assistance of their children in their work, but many permit their irregularity in mere carelessness or thoughtless indulgence, and thus render abortive to a great extent the labor of the teacher for their instruction. But while we encounter these hindrances continually the good work still goes on in its office of gradual improvement.

ANNE ARUNDEL COUNTY—SUMMARY OF SCHOOL STATISTICS.

BALTIMORE COUNTY.

O. R. BENSON, *President*.THOS. C. BRUFF, *Secretary*.

The Annual Report of the Public Schools of Baltimore county is herewith respectfully submitted.

There is little of importance to communicate at this time which is not contained in the regular tables. While the present Board of County Commissioners have provided regularly for the annual increase of pupils by a proportionate increase in the appropriations for current expenses, no provision has yet been made for the floating indebtedness, explained heretofore in former reports. For several years past the county school tax has been exhausted at the close of the Winter Term, January 31st. The alternative is then to close the schools for the Spring Term, or to borrow the money to keep them in operation, paying the obligations from the appropriations for the next year. The School Board has adopted the latter plan, paying on an average about \$430 a year for discounts. While the county remains intact this system of financiering can do great harm; the danger arises from the "Belt" being annexed to the city, leaving the deficiency unpaid and without compensation for the school property within its limits; the injury to the balance of the county would then be irreparable. A matter of so vital importance should receive the attention it deserves and should be attended to at once.

Successful efforts have been made to keep down expenses, and the indebtedness remains about the same as in the beginning of the present Board's administration. Yet this has not been done without embarrassment; applications for new houses have been laid over; needed repairs have been refused; book orders curtailed; and last but not least, teachers' salaries have been reduced. At best these are but temporary expedients; the natural growth of the schools more than counterbalancing any saving from these items. Some-

thing else must be done, and that soon, to keep the school machinery running without friction. The following figures speak for themselves and clearly show the importance of the public school system as well as the people's appreciation of it. Items directly controlled by the Board such as building, furniture, repairs and interest are deducted from the total cost for any one year; the remainder is the minimum running expenses. This divided by the average enrolment of pupils gives the per capita cost for the year.

Year.	Total cost of schools.	Building, repairs and furniture, etc.	Minimum running expenses.	Average number pupils enrolled.	Average cost per pupil.
1869.....	\$92,705 51	\$5,091 11	\$87,614 40	5,378	\$16 29
1870.....	96,828 47	13,815 38	83,013 09	5,475	15 16

1876.....	111,063 65	4,631 85	106,431 80	6,978	15 25
1877.....	122,897 19	17,479 62	105,417 57	7,277	14 48
1878.....	141,755 16	28,157 99	113,597 17	7,784	14 60
1879.....	149,062 71	31,898 65	117,164 06	8,190	14 30
1880.....	148,553 43	28,098 23	120,455 20	8,405	14 33
1881.....	149,494 06	25,292 03	124,202 03	8,200	15 15
1882.....	169,452 15	33,691 65	135,760 50	8,843	15 35
1883.....	159,447 40	21,851 02	137,596 38	9,283	14 83
1884.....	163,200 33	16,797 48	146,402 85	9,909	14 77
1885.....	180,270 40	23,260 53	157,009 87	10,726	14 63
1886.....	166,450 32	9,827 72	156,622 60	10,982	14 26

Since 1869, when the present school law went into operation, the number of pupils attending school has more than doubled, while the average cost of educating each pupil is nearly 12 per cent. less than it was 17 years ago. These facts should offer sufficient argument to refute any charge of extravagance in the management of school affairs.

THOS. C. BRUFF,
Secretary.

ALTIMORE COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1886.

	1886.	1885.

SCHOOLHOUSE BUILT DURING THE YEAR.

No. of school, 4; district, 3; building, frame; cost, \$379; length, 26 ft. width, 22 ft.; height, 11 ft.; size of blackboard, 48 ft.; no out-buildings; no fences; cost of furniture, \$122.50

No. of school, 8; district, 3, frame; cost, \$344.95; length, 26; width, 22; height, 11; blackboard, 48; out-buildings, no; fences, no.

We have also built two colored schools at a cost of \$240 each. To raise the necessary money we closed the schools (formerly taught in churches) until the teachers' salaries covered the amount of cost.

CAROLINE COUNTY.

DR. ENOCH GEORGE, *Pres.*M. BATES STEPHENS, *Sec.*

The Annual Report of the Public Schools of Caroline county, for the scholastic year ending June 30th, and the fiscal year ending September 30, is herewith, respectfully submitted. If a comparison of this, with the last annual report be instituted, it will be found that there is a slight decrease both in enrolment and in attendance of pupils for this year as compared with last, which we believe to be due, not to any lack of interest in the cause of education, but perhaps to the influence of private schools in some parts of the county.

The white schools were kept open three and four-fifths terms; but the attendance for the month of June was so very small that it is thought inexpedient to keep open the schools longer than the middle of June, at least. The colored schools, at the request of the colored people, did not open until January, and were continued until the first of June, making the length of time they remained open the same as heretofore. This of course accounts for the falling off in the number of pupils present on the first day of December as compared with the reports of former years.

Three new houses have been built during the year, two of which are herewith reported. The third, a beautiful Academy at Ridgely (Dist. No. 2, School, No. 8); and the furniture for these three houses are not reported because as yet they are not paid for. For the past few years a special effort has been made by the School Board

to increase the convenience and comfort of both teacher and scholar and the success made in this direction is, indeed, gratifying.

The condition of the board financially, as is shown by report, is satisfactory. A considerable expense has been incurred here of late by the extra amount of building and repairs, but we expect to cancel all indebtedness by the close of the present fiscal year.

CAROLINE COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1886.

	1885.	1886.

CECIL COUNTY.

F. S. EVERIST, *President.*

REV. JNO. SQUIER, *Secretary.*

In transmitting the Annual Report of the Public Schools of the county, we have little to add to what is contained in the report itself. We have not been able to keep the schools open more than three and a half terms because of limited finances.

Our county has levied for the coming year an additional sum of \$12,000, for the purpose of erecting new schoolhouses, and we will then have the county supplied almost entirely with commodious houses, well furnished with good furniture.

We are also pleased to state that, after the close of next year, we will have a levy sufficient to keep the schools open for the full term.

CECIL COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1886.

	1886.	1885.
Number of schoolhouses.....	84	
(Frame, 59; brick, 14; stone, 11.)		
Number of male teachers, principals—(white, 18; colored, 4; total, 22).....	22	
Number of female teachers, principals, (white, 58; colored 18; total, 76).....	76	
Number of female teachers, assistants, (white, 31; total, 31).....	31	
Total, (white, 107; colored, 22; total, 129).....	129	
Number of fenced lots.....	35

CHARLES COUNTY.

DR. GEO. D. MUDD, *President.*A. W. NEALE, *Secretary.*

I herewith respectfully submit the Annual Report of Charles county schools for the past scholastic and fiscal years. The figures show but little difference from the last two or three years. The low price of farm products has had its effect in this county upon attendance at the public schools. Farmers being unable to hire the usual amount of farm help had to retain their children at home to assist in the cultivation and saving of their crops. But for this, I think this report would have made a better showing as to attendance than we have been able to show for many years.

CHARLES COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending June 30, 1886.

	1886.	1885.
Number of schoolhouses.....	66	66
(Frame, 66; brick, 0; log, 0; stone, 0.)		
Number of male teachers—principals—(white 33; colored, 7; total, 40).....	40	39

FREDERICK COUNTY.

SAMUEL DUTROW, *President*F. R. NEIGHBOURS, *Secretary*.

DEAR SIR: In presenting the report for the year ending September 30, 1886, I am compelled to rely chiefly upon the data left by my predecessor. Our schools seem to have gained slightly in total enrolment, also in average attendance. This gives evidence of increased interest on the part of parents and children, which is gratifying, for it is not only to the large enrolment but to the regular attendance that we must look for encouragement and success in our public school work. This increased interest is, in a great measure, attributable to the beneficial effects of the "Teachers' Institute," held during the month of November, 1885. Visible evidence of its effects can be seen in every portion of the county in the ornamentation of our schoolhouses and grounds. True, the drones have not been touched with the love for the beautiful, and here and there blank and dusky walls meet the eye; but we are glad to state that these are the exceptions, for as a general rule the schoolrooms present a bright, cheerful, homelike appearance of comfort and refinement. These in connection with the merry songs from happy hearts that greet us in almost every school, points unerringly to the exercises of the Institute, and if in these we can so plainly trace its good influences, it is but fair to conclude that new ideas and better methods of disciplining schools and in imparting instruction were also inculcated, which though slower in developing, will be of lasting benefit

to our schools in the future. Our School Board applied to the County Commissioners for sufficient funds to run the schools nine months, but failed to secure the appropriation. They have, however, manifested a more liberal spirit than heretofore, and we are led to believe that a larger amount would have been levied this year for the support of our public schools if they had not been called upon to provide for pressing demands from other sources.

FREDERICK COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending June 30, 1886.

	1886.	1885.

GARRETT COUNTY.

C. M. MILLER, *President.*E. H. BARTLETT, *Secretary.*

In addition to the report of the public schools of Garrett county for the year ending September 30, 1886, there is very little to say, otherwise than explanatory of the discrepancies in itemized statement of receipts and disbursements as compared with report of actual receipts and disbursements. The amount of teachers' salary is reported in full for each school taught, and the amount received by the teacher for books sold has been deducted from the salary. The amount reported in "receipts" as coming from "sales of books" is what was actually received from book agents. Teachers' salaries due by former Boards have been paid by present Treasurer, and so in items "fuel, incidental expenses, furniture, &c., &c., which could not properly be embraced in tabulated report of schools for the last scholastic year.

In January, 1886, when the present Board assumed control of the public schools of the county, financial matters were found to be in such a state that it became necessary to close the schools (which was done as soon as proper notice could be given), and attention turned to liquidation of obligations contracted by their predecessors. We trust in our next report to present a very much more favorable condition of affairs.

GARRETT COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1886.

	1886.	1885.
Number of schoolhouses (frame, 86; brick, 1; log, 5).....	92	95

HARFORD COUNTY.

ARTHUR VOSBURY, *Pres't.*NOBLE L. MITCHELL, *Sect'y.*

The report of the public schools of Harford county is respectfully submitted. I know of nothing of special importance to which to call attention, outside of what is embodied in the annual statement.

The enrolment and attendance during the year just closed show a slight improvement over last year. Our corps of teachers is becoming larger and the demand for more schoolhouses is growing stronger, as will be noticed by this report, that we had in successful operation during part of the year one hundred and three schools against ninety-five in 1885, which necessarily increased the number of teachers actually engaged in educational work. Our teachers show a fondness for their work and a desire to advance and improve. Our buildings, with few exceptions, are comfortable and well furnished, and I think within a few years we will be able to replace the few old buildings now remaining with new ones. Owing to the very disastrous flood which occurred in August of last year, and which destroyed nearly fifty thousand dollars worth of bridges, &c., our Board did not ask for an appropriation for schoolhouses for this year. It has been the usual custom to build several houses each year, but in order to keep the taxes, which were materially increased to cover the losses previously mentioned, as low as possible, the Board only asked for and obtained a sufficient amount to cover the necessary school and office expenses.

HARFORD COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending June 30, 1886.

	1886.	1885.
Number of schoolhouses.....	103	95
(Frame, 91; brick, 5; log, 2; stone, 5.)

HOWARD COUNTY.

W. MACKINTOSH, *President.*JNO. T. THOMPSON, *Secretary.*

DEAR SIR :—We herewith transmit to you our Annual Report of the Public Schools of Howard county, for the fiscal year ending September 30, and the scholastic year ending June 30, 1886. A lack of funds compelled us to shorten the Summer term, and to close the schools throughout the county on the 28th day of May. There are now 53 schools in the county, but we receive no more money for their support than we did ten years ago when there were only 44 schools. We began the year with an indebtedness of \$2,171.05, and, although the appropriations from all sources were hardly sufficient to meet the necessary running expenses of the schools already in operation, yet two new schools were opened—so urgent were the demands for them—necessitating an outlay for buildings and furniture of about \$1,300. The patrons of these schools contributed largely to the erection of the buildings, which are now among the most commodious and substantial in the county. No more schools are needed now; but some of the present houses are in a bad condition, and must soon be replaced with new and comfortable ones. Our indebtedness is now only \$1,382.82, and as the county levy has been increased, we hope to keep the schools open ten months this year.

HOWARD COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1886.

	1886.	1885.
Number of schoolhouses.....	53	51
(Frame, 49; brick, 1; log, 2; stone, 1.)

KENT COUNTY.

R. W. JONES, *President.*EBEN F. PERKINS, *Secretary.*

Our last Annual Report was a full review of the decade, and we have but little now to add to the statistical tables. One schoolhouse was rebuilt and enlarged during the vacation and several have been repaired.

Our County Teachers' Association held five regular meetings during the school year, at one of which the Principal of the State Normal School was present.

KENT COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending June 30, 1886.

	1886.	1885.
Number of schoolhouses, white, 45; colored, 18 (Frame, 60; brick, 3.)	63	63

MONTGOMERY COUNTY.

R. T. WHITE, *President*.S. R. WHITE, *Secretary*.

In submitting the Annual Report of the Public Schools of Montgomery county, the tables will show the totals for the year. As a result of the shortage upon the part of the State for June and July, amounting to \$833.45, the fiscal year closes with nearly \$500 deficit. The October instalment, however, will meet this, provided, the future instalments do not fall short. With about two exceptions the county has good houses, fairly furnished with blackboards and globes.

The teachers as a class are improving in the advanced methods of teaching and meet quarterly for mutual improvement. While much has been done in the past, much more remains to be accomplished to bring the schools up to the demands of the times.

MONTGOMERY COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1886.

	1886.	1885.
Number of schoolhouses and colored churches used for schools—(frame, 81; log, 3; stone, 1)	91	91

QUEEN ANNE'S COUNTY.

DR. JAS A. HOLTON, *Pres.*WM. E. THOMPSON, *Sec.*

By authority from the School Board of this county, I have prepared the report of the schools for the year ending September 30. On account of the protracted illness of my father, his official visits were few. I am unable to give any information of the general condition of the schools, except such as is found in the statistical part of the report. The financial condition of the Board is good, though money is needed for the building of two or three houses. In December last, schoolhouse No. 4, E. district No. 2, was destroyed by fire; fortunately there was an insurance for \$615.00 on it, which was promptly paid. A new house was built and furnished at once. As you are aware, Mr. L. L. Beatty has been appointed to fill the vacancy caused by the death of my father.

QUEEN ANNE COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1886.

	1885.	1886.
Number of schoolhouses (frame, 56; brick, 6.)	62	62
Number of male teachers—principals—(white, 19; colored, 9; total, 28.)	28	28

TALBOT COUNTY.

HENRY P. HOPKINS, *Pres't.*

ALEXANDER CHAPLAIN, *Sec.*

We paid out during the year \$3,361.14 for new school buildings, exclusive of furniture. In building schoolhouses we should study to avoid hygienic errors in location and construction, and to provide suitable conveniences for the comfort of our children. It is a crime to disregard the plainest teachings of practical hygiene and to deny to our children in the schoolroom pure air when Providence has surrounded our world with a vast ocean of it. Under certain conditions, consumption and scrofula are developed and generated in imperfectly ventilated schoolrooms and sleeping rooms. How many of the schoolhouses that we are building are fit places in which to confine children for five or six hours of the day? The time has come, in my opinion, for the State Board of Health to arrange a sanitary survey of the schoolhouses in Maryland, and afterwards to lay down, for our guidance, some simple sanitary rules, and suggest some simple but efficient means for ventilation. The State Board of Health might prepare the practical questions from which to make the necessary deductions, and the survey could be made by the teachers and forwarded from each county by the School Examiner. The information thus collected would, at least, be valuable, and the history interesting and suggestive. In such a field the State Board of Health would have an opportunity for doing most valuable hygienic work.

Our teachers as a rule are progressive, and they have done much good work during the year. Many untrained persons of ordinary scholarship, however, are still seeking to crowd into the ranks every year. This ought not to be encouraged. Few will, at this day, deny that teachers need preparation and professional training for their work. They must either learn the art of managing, governing and teaching a school by experimenting upon their pupils, or by undergoing a preparatory course of professional instruction and training. Our School Law in effect, says that no pupil in the public schools of Maryland shall be trusted in the hands of an ignorant teacher. I wish it were possible to place in our schools, also, none but trained teachers. The State Normal School is doing a noble work, but it is inadequate to the task of providing every year the large body of new teachers that are needed in the State, so long as teaching retains as an occupation in so many of our counties its present fluctating character. In your circular letter you very justly complain, too, of being hindered in your cherished desire to extend the course of study in the Normal School, and make it more thorough and strictly professional, so long as the counties continue to crowd the school with pupils so deficient in scholarship as to require years for their academic instruction alone, before they are prepared for any moderate degree even of professional training. While the Normal School trains teachers to understand, for instance, that a knowledge of how to *teach* arithmetic is very different from a knowledge of *arithmetic*, yet we can not get away from the fact that the first essential, of course, is a *knowledge* of arithmetic. I feel the force of your complaint, and, as the most practical remedy that presents itself, I propose that hereafter all applicants for Normal School scholarships be examined in the counties and the City of Baltimore every year on the same day, and that the questions and rules for ex-

amination be prepared by the State Board of Education.

The Normal Institute for Colored Teachers, which was kept open for four weeks, was a success in every way. The model school in connection with the Institute was a great help to the teachers in attendance, and exhibited to many of them the first properly organized and well-managed school that they had ever seen. We had to devote a large portion of the time of the Institute to academic instruction, but the normal work was not neglected. A great deal remains to be done for our colored teachers to improve their scholarship and teaching power. As faithful school officers and conscientious fiduciary agents, however, we cannot neglect this part of our work.

TALBOT COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending June 30, 1886.

	1886.	1885.

WASHINGTON COUNTY.

GEO. W. SMITH, *President*.P. A. WITMER, *Secretary*.

We submit herewith the Annual Report of the Public Schools of Washington county for the fiscal year ending September 30, 1886.

The statistics show a larger enrolment than that of the previous year, but owing to the excessive severity of the winter and the almost impassable condition of the roads in many sections of the county, the average attendance is smaller than that reported last year.

Our financial report shows a deficit of \$3,282.33, which is less than the deficit of last year and which would have been still further reduced but for the unexpected falling off in the June distribution of the State School Tax, which abatement for Washington county amounted to the sum of \$1,124.53. I am glad, however, to have the opportunity to say that the competent and conscientious Comptroller of the State Treasury, Hon. J. Frank Turner, recognizing the legal and moral obligations upon him to keep the fund for the education of the children of the State sacred (obligations which, I regret to say, were sometimes ignored by his predecessors in office), has since, in his October distribution of the State School Tax, fully made up this deficiency which was originally caused by inadequate collections of taxes.

I am gratified to be able to report that the fine two-story school building for Hagerstown has been completed, and is now supplied with a full corps of teachers, eight in number, who have charge of about three hundred pupils. Our people feel a just pride in this new house, as it not only presents a fine architectural appearance, but is regarded by all as thoroughly well adapted to school purposes. We have established in the building a Female High School Department under the control of Miss Annie Barkdoll as principal.

Twelve additional teachers have been employed in the schools of the county for the current year, and we hope to show a decided improvement in enrolment and attendance.

WASHINGTON COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending September 30, 1886.

	1886.	1885.
Number of schoolhouses.....	132	129
(frame, 34; brick, 75; log, 14; stone, 9)

WICOMICO COUNTY.

JAMES CANNON, *President.*THOS. PERRY, *Secretary.*

The annual report of the School Board for Wicomico county, is herewith respectfully submitted. I know of nothing that requires special mention, unless it is the fact that the Board is materially improving school property in the county. "Balloon" buildings are no longer being erected, but in their stead substantial, durable ones. These are both comfortable and ornamental. Good work is being done by our teachers throughout the county. They are industrious and fairly well qualified for the work. The great conflagration of October 17th, 1886, in this town, totally destroyed our new High School building which was erected in 1882 at a cost of \$4,200 and supplied with furniture at an expense of \$400 more. Upon this building there was an insurance of \$2,800, which is not sufficient to build another adequate for our demands. The Board is unable to see its way clearly out of this difficulty.

As a matter of necessity, we were compelled at the beginning of the session of 1886-7 to reduce teachers' salaries 5 per cent, a step which we much regretted being compelled to take.

WICOMICO COUNTY—SUMMARY OF SCHOOL STATISTICS.

For year ending June 30, 1886.
